

SonicWALL Comprehensive Gateway Security Suite

NETWORK SECURITY

Complete Network Security in a Single Integrated Package

Understanding network security can be complicated. Ensuring your network is secure from malicious threats shouldn't be. That's what SonicWALL® Comprehensive Security Suite (CGSS) is all about. The Comprehensive Gateway Security Suite turns any SonicWALL network security appliance into a complete solution and removes the complexity associated with choosing between a host of add-on security services by integrating all the services required for total protection into a convenient, affordable package.

Available on E-Class NSA, NSA and TZ Series network security appliances, SonicWALL CGSS keeps your network safe from viruses, spyware, worms, Trojans and more. Even before new threats are identified, the SonicWALL security solutions are automatically updated with signatures that stop attacks before they can enter your network, ensuring you have around-the-clock protection. Your SonicWALL solution also has the ability to manage internal access to inappropriate, unproductive and potentially illegal Web content with comprehensive content filtering. Finally, the services bundle also includes around-the-clock technical support, crucial firmware updates and real-time reporting capabilities.

SonicWALL Comprehensive Security Suite includes the following:

- Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention Service subscription (1-year)
- Content Filtering Service subscription – Premium Edition on E-Class NSA and NSA, and Standard Edition on TZ Series (1-year)
- 24x7 Support subscription – E-Class Support 24x7 on E-Class products and 24x7 Support on all others
- ViewPoint Reporting license

Features and Benefits

A **complete network security solution** that integrates everything you need for comprehensive protection from threats such as viruses, spyware, worms, Trojans, adware, keyloggers, malicious mobile code (MMC) and other dangerous applications.

Gateway anti-virus, anti-spyware and intrusion prevention provides real-time security against the latest viruses, spyware, software vulnerabilities and other malicious code.

Content filtering reduces liability concerns and increases employee productivity by providing the ability to manage access to objectionable or even illegal online content.

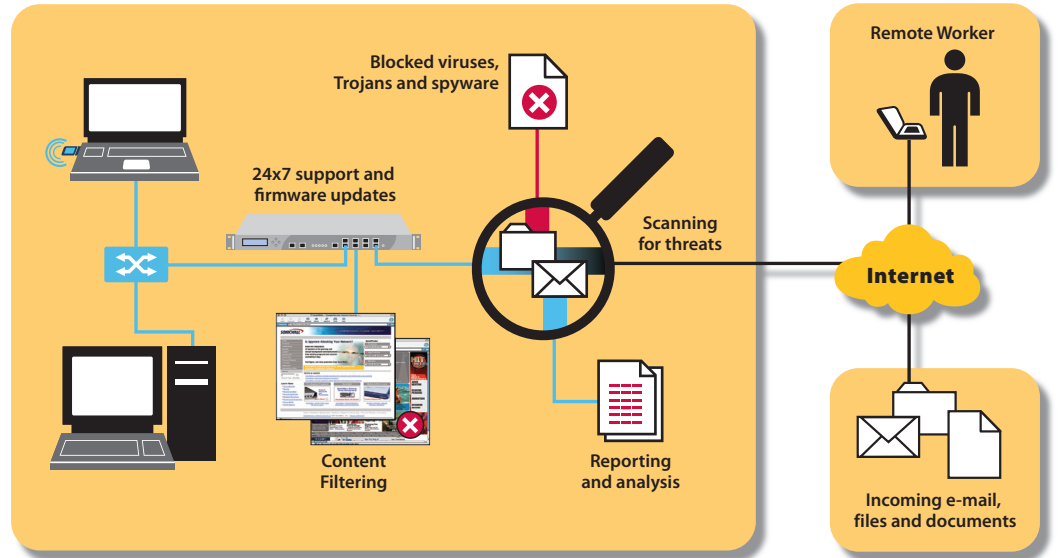

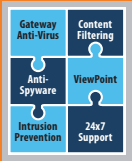

24x7 Support protects your business and your SonicWALL investment through crucial firmware updates and upgrades, the finest technical support, timely hardware replacement and access to electronic self-help tools.

ViewPoint reporting software provides easy-to-use Web-based reporting that delivers instant insight into the health of your network through dynamic real-time and historical reports.

- **Complete network security solution**
- **Gateway anti-virus, anti-spyware and intrusion prevention**
- **Content filtering**
- **24x7 Support**
- **ViewPoint reporting software**

SonicWALL Secure Network

TotalSecure Network

CGSS Services At a Glance

Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention Service

- **Real-time gateway anti-virus engine** that scans for viruses, worms, Trojans and other Internet threats in real-time.
- **Dynamic spyware protection** blocks the installation of malicious spyware and disrupts existing spyware communications.
- **Powerful intrusion prevention** protects against an array of network-based threats such as worms, Trojans, peer-to-peer and instant messenger applications and other malicious code.
- **Dynamically updated signature database** for continuous threat protection.

Content Filtering Service (CFS)

- **Comprehensive content filtering** provides control of internal access to inappropriate, unproductive and potentially illegal Web content.
- **Web site ratings cached locally** on SonicWALL network security appliances make response time to frequently visited sites virtually instantaneous.
- **Dynamically rate pages** that are not in the database and automatically populate the database for future access. Only available in Content Filtering Service Premium Edition.

ViewPoint Reporting Software

- **Comprehensive set of graphical reports** provide visibility into suspicious activity and employee productivity.
- **"At-a-glance" reporting** provides a customizable view that illustrates multiple summary reports on a single page.
- **Compliance reporting** gives administrators the capability to generate and view reports that fulfill compliance requirements.

24x7 Support

- **Software and firmware updates and upgrades** maintain network security to keep your solution as good as new.
- **Access to telephone and Web-based support** for basic configuration and troubleshooting assistance around the clock.
- **Advance Exchange** hardware replacement in the event of failure.
- Annual subscription to SonicWALL's Service Bulletins and access to **electronic support tools** and moderated discussion groups.
